

TAYLOR ENGINEERING, INC.

Jacksonville, FL - October 2006

To exemplify the company's values and commitment to technical excellence, Taylor Engineering recently donated \$1,000,000 to the University of North Florida to fund the Taylor Engineering Research Institute. A not-for-profit organization, the Research Institute will perpetually fund, through interest and grants, research and development in coastal and water resource engineering and science. The institute provides a vehicle for researchers in industry, government, and academia to advance the understanding of the principles key to these disciplines, as well as to develop the advanced tools necessary to apply this understanding. As a public-private partnership, the Research Institute also demonstrates the company's values in community involvement and its desire to share its success with the community.

TAYLOR ENGINEERING specializes in Coastal Engineering, Hydrology and Hydraulics, Waterfront Engineering, and Environmental Services with offices in Jacksonville, West Palm Beach, Tampa, and Baton Rouge, LA.
