

TAYLOR ENGINEERING, INC.

Jacksonville, FL - January 2008

In 2008, Taylor Engineering, Inc. celebrates a milestone — 25 years in business.

In 1983, Taylor Engineering opened as a one-man shop providing coastal engineering services to a modest number of clients. Over time, founder R. Bruce Taylor, Ph.D., P.E. expanded his company's client base and service offerings to a multimillion dollar enterprise. Taylor Engineering (employee-owned since 1996) now offers water resources and waterfront engineering, environmental services, GIS, and coastal engineering expertise to an eclectic client list that includes federal, state, and city agencies across the country. This broadening of complementary disciplines and expertise has evolved by design, so that today, Taylor Engineering can address engineering problems from interior watersheds to the continental shelf. Almost 100 employees now staff offices in Jacksonville, West Palm Beach, Tampa, and Baton Rouge, Louisiana.

Taylor Engineering feels proud of its longevity. To survive, let alone to excel, in a competitive marketplace underscores the company's reputation and the values it embraces. Let the celebration begin.
